LETTER FROM CEO

Dear customers, partners and friends,

Thank you for your interest in INKAS® Armored Vehicle Manufacturing, a world leading manufacturer of armored vehicles. For almost 20 years, we have been providing our clients with remarkable safety solutions and anticipating their personal and corporate security concerns on a broad scale. Over the years, our top has always been to deliver results that exceed our customers' high expectations.

On behalf of the entire company, I would like to thank all of our clients who entrust us in protecting their lives on a daily basis. We are committed to satisfying the needs of our customers in the face of ever changing and evolving threats to personal safety and offer a wide range of customized armored vehicles in order to save lives across the globe.

We are proud to provide the highest standards of quality, design and workmanship in the industry. At INKAS®, we aim to over-deliver with every job by offering stellar customer service, quick turn-around and knowledgeable recommendations when it comes to selecting an armored car.

Next time you are considering the ultimate piece of mind without compromising comfort and protection, we look forward to hearing from you!

*Sincerely,
David Khazanski, CEO*

WHY INKAS®?

WWW.INKASARMORED.COM

INKAS® Armored Vehicle Manufacturing is a Canadian firm that specializes in the design and production of a wide variety of armored vehicles; from luxury cars to cash in transit and other special purpose vehicles. Since 1996, INKAS® Armored Vehicle Manufacturing has been providing armored vehicles for banks, law enforcement agencies, corporate clients and private individuals all over the world.

Headquartered in Toronto, Canada, with sales offices and workshops worldwide, INKAS® Armored Vehicle Manufacturing fulfills all orders, regardless of size, with an individual approach catering to the needs and requirements of every customer.

INKAS® Armored Vehicle Manufacturing is one of the largest armored vehicles manufacturers in North America, with a production capacity of over 30 vehicles per month and a turnaround time at the very top of the industry. Security and safety are the key guiding principles of the company. All materials are certified by third party organizations as well as tested at INKAS® own testing facility in Toronto, Canada.

At INKAS®, we take great pride in manufacturing products which save lives. Thankfully, only a small percentage of our civilian vehicles are ever fired upon. But if they are, we are proud to share that they have fulfilled their purpose with a 100% success rate.

PRODUCTION FACILITY

WWW.INKASARMORED.COM

INKAS® Armored Vehicle Manufacturing is headquartered in Toronto, Canada with a footprint surpassing 200,000 square feet. The capacity of our manufacturing plant allows us to satisfy our customers' safety needs with quick turnaround, on-time delivery, and the highest standards of manufacturing using the best quality materials and a skilled work force. We pride ourselves just as much in our product offering as we do in our manufacturing and quality control processes.

Our plant is equipped in accordance with the latest technologies allowing us to manufacture products of high quality on a tight schedule. INKAS® employs the latest laser cutting and bending systems, which don't affect the structure of the metal allowing it to serve its purpose. This modern machinery coupled with custom-built software reduces the set times, enhances efficiency and boosts quality of our metal fabrication products, which is a top priority for the business of saving lives - INKAS® stands behind its products.

WWW.INKASARMORED.COM

HIGHLY-TRAINED PERSONNEL

WWW.INKASARMORED.COM

All INKAS® Armored Vehicle Manufacturing employees are highly skilled, well-trained and experienced professionals. Our engineers have a proven track record of designing and implementing efficient and innovative solutions, which are based on their extensive knowledge of all aspects within the ballistic protection industry, including detailed knowledge of potential threats and countermeasures. The engineering team is dedicated to further developing our current production line based on technological innovations and customers' feedback.

INKAS® assembly workers are experienced and meticulous welders, metal workers and upholsterers. Since we have been manufacturing armored vehicles for almost 20 years, we have established strict quality assurance and control procedures to which all our workers adhere. Due to the innovative corporate culture found at INKAS®, all our workers are constantly learning and implementing new methods and technologies.

WWW.INKASARMORED.COM

OUR PROCESS

INKAS® Armored Vehicle Manufacturing has been producing bulletproof vehicles for almost 20 years. During this period, we have been constantly adapting our approach to armoring using ever-changing technology. Since 1996, our production process has been improved and optimized in a way allowing us to serve customers more efficiently. By implementing transparent policies and procedures, we are able to effectively organize and control the armoring steps keeping our turnaround time at the very top of the industry. Our ability to streamline complex processes sets us apart of our competitors and ensures the highest quality of our products.

In order to provide the highest level of protection, INKAS® implements a full assortment of advanced defensive technologies. We build our vehicles utilizing only the highest quality materials, including the latest composite light-weight armor solutions. The materials chosen for each vehicle are selected in accordance with the client's desired level of protection. One of the advantages of our manufacturing process is the ability to provide a vehicle which will maintain its original appearance and performance.

Our production process is broken down into three distinct stages and at each of these stages we have implemented strict quality control procedures ensuring the highest possible quality for every vehicle that rolls off the line. In order to follow our mission of saving lives and fulfilling our vision of guaranteeing the peace of mind in safety and security, we are committed to further reviewing and enhancing our production process and armoring technologies and striving towards continuous improvement.

PREPARATION STAGE

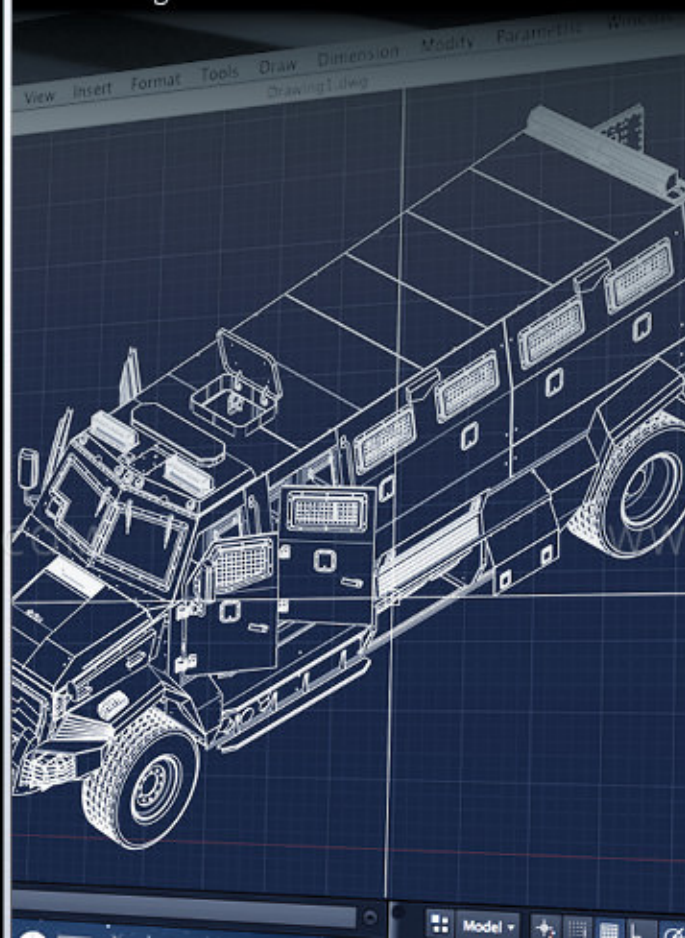

WWW.INKASARMORED.COM

Following our commitment to provide clients with vehicles that offer the ultimate in protection and operational capabilities, our production process commences with engineering and design. Our professional engineering team designs all materials required for armoring using advanced 3D modeling systems. Following, the design project is submitted for precision laser and cutting. At INKAS®, we only use certified materials. All our components are tested by independent laboratories as well as by our trained staff within our in-house testing facility. Once components are ready, we completely strip the vehicle down to its bare frame, inspect OEM parts and organize them in individual storage.

WWW.INKASARMORED.COM

ENGINEERING & DESIGN

The engineering team designs and outlines all materials required for armoring using 3D software as well as preapproved vehicle drawings.

MATERIALS TESTING

WWW.INKASARMORED.COM

All materials are tested for their ballistic properties by independent laboratories as well as by our trained staff at the INKAS® firing range.

METAL FABRICATION

WWW.INKASARMORED.COM

Once the design project is created, it is submitted for precision laser cutting on the latest models of metal fabrication machines supplied by Bystronic.

INITIAL INSPECTION

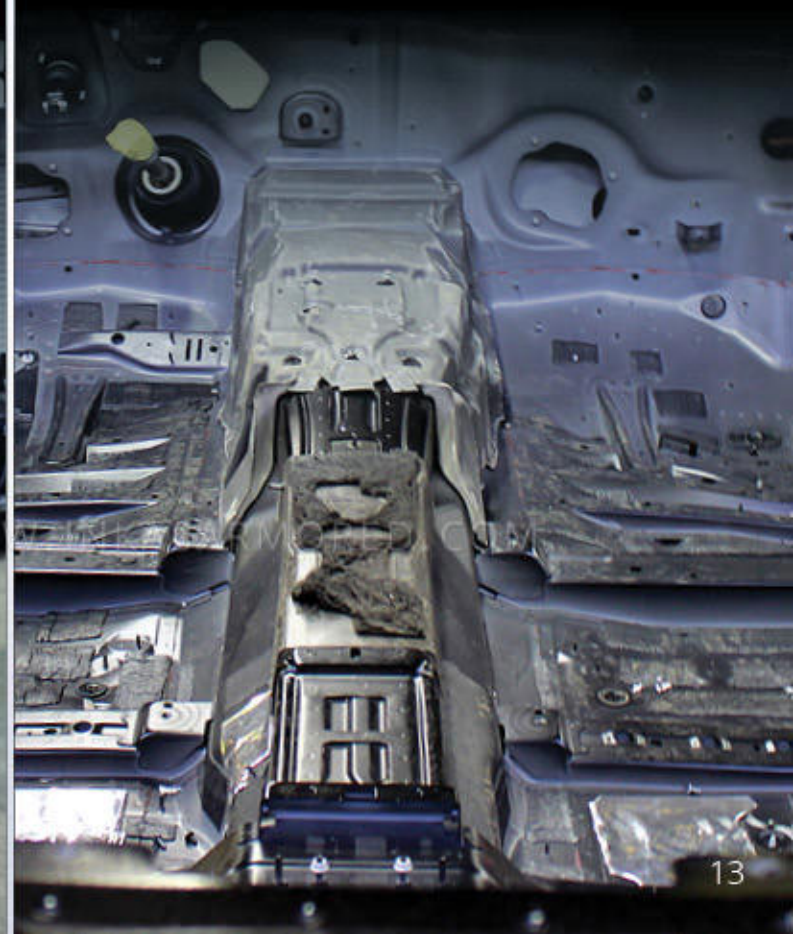

WWW.INKASARMORED.COM

The OEM chassis is delivered to the armoring plant and inspected for shipping damages, manufacturer defects and is prepared for the strip down process.

STRIP DOWN

The vehicle is completely stripped down to its bare frame. All OEM parts are inspected and organized neatly in individual storage.

ARMORING STAGE

WWW.INKASARMORED.COM

We start the actual process of armoring by adding armor plates or light-weight composites to the roof, floor, side walls and rear area of the chassis. The vehicle is then equipped with the unique INKAS® overlap systems, which are installed in all vehicle openings and gaps between the doors and the vehicle's frame. The suspension and braking systems are also modified and reinforced to handle the added weight of the armor. We then move to the protection of the battery, fuse box and ECM and lastly, the vehicle is outfitted with high-performance run-flat tires.

WWW.INKASARMORED.COM

VEHICLE PREPARATION

WWW.INKASARMORED.COM

The entire surface of the vehicle is covered with a specialized protective barrier designed to protect it from surface damage during the process of armoring.

VEHICLE ARMORING

Armor plates are installed within the floor and roof; the doors are removed and armored separately. An overlap system is installed in the vehicle's door and window openings.

UNDER-HOOD PROTECTION

WWW.INKASARMORED.COM

The battery, fuse box, and ECM are plated with protective ballistic steel. The suspension and braking systems are modified and reinforced to support additional weight of armor.

RUN-FLAT DEVICES

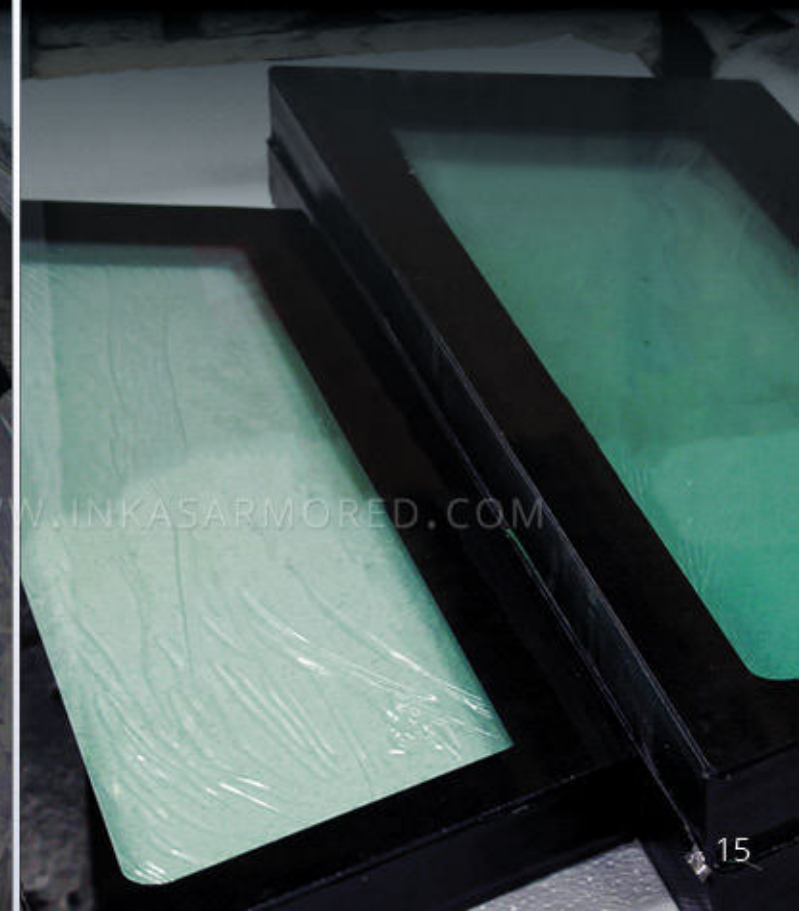

Run-flat devices are installed within the vehicle's wheels in order to help the driver remain in control of the vehicle in the event of an attack.

BALLISTIC GLASS

WWW.INKASARMORED.COM

Thick bulletproof glass is installed in all openings. Depending on customer specifications, the windows can be left fully operable (up/down) or inoperable.

FINALIZATION STAGE

WWW.INKASARMORED.COM

Once the vehicle is fully armored, it is upholstered with leather, wood or plastic composites in accordance with the requirements of the customer. Our technicians pay special attention to the small details in order to ensure the quality of the finished product. If required, at this stage we also add special options such as sirens, strobe lights, fire suppression systems, etc. Once the vehicle is fully re-assembled, it undergoes a strict quality control process. All vehicles are inspected by a trained team responsible for ensuring that the vehicle meets all armoring standards, performance and craftsmanship levels.

WWW.INKASARMORED.COM

INTERIOR MODIFICATION

WWW.INKASARMORED.COM

The vehicle is upholstered with materials such as leather, wood or plastic in accordance with the requirements of the customer and the initial design specifications.

ADDITIONAL FEATURES

If specified in the order, the vehicle is further equipped with additional features including but not limited to sirens, dual door locks, spotlights, gun ports and air filtration systems.

COMPLETE REASSEMBLY

WWW.INKASARMORED.COM

The vehicle is fully reassembled with special attention to detail. All of the vehicle's mechanical and electrical systems are checked during this process as well.

PRE-DELIVERY INSPECTION

WWW.INKASARMORED.COM

The vehicle is inspected and a road test is performed in order to ensure strict compliance with specifications as well as function of all the installed equipment.

VEHICLE DISPATCH

The fully armored vehicle is given a pre-shipment inspection, complete wash and detail, and a written sign-off. Then the vehicle is wrapped and prepared for shipment.

OUR INNOVATIONS

WWW.INKASARMORED.COM

WWW.INKASARMORED.COM

To address the threats our customers face all over the world, INKAS® Armored Vehicle Manufacturing implements the best practices in technological innovation, design and quality management. We are proud to be an innovative company, which is constantly investing in the R&D of lightweight armor, composites and integrated design solutions. By maintaining our innovative focus we always look for better platforms with which to serve our customers and provide them with the latest safety and security solutions.

Since 1996, INKAS® has been taking advantage of the modern technological advancements available to manufacture high quality products. Our innovative approach includes everything from developing the latest in composite materials and engineering advancements, to having a firm grasp on political situations as well as threat levels around the world.

We take pride in creating and maintaining the culture of innovation in the company. We encourage our staff to attain and implement new knowledge and methods allowing us to be at the top of the security industry. Our innovative approach helps us develop and introduce new generations of vehicles and serve new customers in new markets.

WWW.INKASARMORED.COM

WWW.INKASARMORED.COM

LIGHTWEIGHT ARMOR

With a new generation in armoring materials INKAS® takes advantage of modern equipment in order to achieve an armor plate which meets international standards in terms of resistance while weighing as little as half of what industry-standard armor plates of the same size weigh. Revolutionary light-weight armor incorporated into INKAS® vehicles allows for increased maneuverability and speed performance in comparison with similar vehicles on the market.

UNPRECEDENTED APPROACH

INKAS® employs the latest line of CNC cutting and bending machines supplied by the world leader in steel processing systems – Bystronic. Using state-of-the-art equipment we have enhanced production efficiency as well as boosted quality. The implementation of the latest technologies in laser cutting and bending without weakening the metal on a molecular level is what gives us the ability to supply armored vehicles that guarantee safety and security.

VEHICLE CONTROL SYSTEMS

INKAS® has developed and launched an innovative Limousine Control system allowing passengers to operate the vehicle's extensive features from an iPad or similar tablet. The system allows for the control of the lighting system, seating configuration, perimeter surveillance, audio and TV as well as operating the partition between the driver and the passenger compartment. Due to its friendly multilingual user interface the limo control system was warmly welcomed by our customers around the globe.

ARMORED LIMOUSINES

INKAS® takes great pride in providing our clients with bulletproof limousines for all purposes. We work closely with our sister company – INKAS® Professional Vehicle Manufacturing – to offer the latest technologies in vehicles conversion. With an added center partition vehicles can serve as executive offices on wheels or special events venues. The interior of our limousine vehicles is either upholstered to match factory specifications or completely removed and fully customized offering a truly high quality fit and finish.

BALLISTIC CHART

At INKAS®, we begin designing our armored vehicles by first conducting a complete threat assessment of the region to where it is to be delivered. We manufacture vehicles in a such way that the protection level obtained exceeds the identified level of the potential threat, thereby significantly increasing the vehicle's level of safety.

It's hard to find a better option for those who require a premium driving experience coupled with ultimate passenger protection.

This demanding SUV based on Mercedes G63 AMG never loses its footing, regardless of situation. With a CEN BR6 level of armoring, this armored SUV from INKAS® ensures a safe drive, even post-attack.

The hulk like appearance and the big lights do attract a large line of customers for owning the SUV that never spoils a drive. This tank on wheels is driven by a 5.5L, 8-cylinder twin turbo engine providing roughly 544hp of raw power. The extra spacing between seats, refined suspension and smooth driving optimizations makes it a staple choice when it comes to comfort and luxury. Our armored SUV based on the G63 AMG comes with perimeter armoring of the passenger compartment in order to provide protection against 7.62mm, 308 Winchester FMJ ammunition, in accordance with NIJ Standard 0108.01 Level 3 and/or CEN 1063 Level BR6. The vehicle floor is armored to withstand blasts and shrapnel from detonation of 2 x DM51 grenades detonated simultaneously.

If there's a safer place to be in a breakout, it would be hard to find one with better seating.

While it looks essentially stock – even retaining the factory side exhaust – the INKAS® G63 is fully armored, with a reinforced roof, doors, glass, quarter panels, firewall and pillars.

Built with strong attention to every detail this armored vehicle is definitely one of the most popular choices for those in demand of a secure and comfortable drive.

With its 429HP 4.7 Liter V8 engine, 7 speed automatic transmission, 4MATIC permanent AWD – the Armored SUV based on Mercedes GL-550 is definitely one of the most popular choices for those looking for an armored SUV today. The bold styling of the SUV based on the iconic Mercedes GL-class is complimented by a multitude of chrome highlights. From the beltline moulding that accentuates its prominent lines, to the roof rails, the tasteful use of chrome gives the armored SUV the regal appearance it commands when light from the sun strikes its frame.

Everything within the interior of the armored GL-Class is hinged upon the comfort as well as general safety of its passengers. Both its available space and luxurious appointments are impressive. Moreover, the interior can be customized with additional pieces in order to step up the level of refinement as well as security.

With seating of up to 7 passengers comfortably, this SUV makes for a great people-carrier as well. Climate-controlled, multi-contour seats, luxury front headrests and ambient lighting ensure that those traveling within this vehicle will be at the highest level of comfort possible.

From stretched out Mercedes G-Class sport utilities to armored cash-in-transit Sprinters that look like your local plumber's van, the custom body work that comes out of INKAS® is enough to make the honchos in Stuttgart proud—matching factory body work line-for-line.

Being one of the most luxurious SUVs, this armored Range Rover is the best choice for those looking for the highest levels of luxury, safety and comfort.

The Land Rover Range Rover is one of the most luxurious full-sized SUVs due to its exquisite interior, nimble handling, a comfortable ride and outstanding off-road capabilities. Integrating armoring solutions to the SUV, INKAS® Armored Vehicle Manufacturing delivers paramount security in a world-class package.

The armored Range Rover is offered with a 5.0 supercharged V8 engine producing an impressive 510hp and 461 lb. ft. of torque and is coupled with a six-speed automatic transmission with manual shift control. Amenities are just as plenty as horsepower with a standard Dynamic Response suspension system, self-park function, heated and cooled seats, touch screen display and huge panoramic sunroof. In addition to this armored SUV's stock safety features, INKAS® adds armoring solutions to protect occupants from the dangers found in the hostile outside world. INKAS® own proprietary overlap system is integrated to provide 360-perimeter protection up to CEN BR6 level of armor.

The armored Range Rover is an outstanding vehicle and is only made better with INKAS® engineers innovative armoring.

Shoot, we don't even think there's another after-market company that can offer a top-class combination of security and luxury quite like INKAS® Armored Vehicle Manufacturing.

This armored SUV is one of the most popular choices due to its ability to offer 360-degree protection while still managing to maintain the highest levels of comfort and class.

This 383HP Armored SUV is surely at the top of everyone's list. The INKAS® Armored Lexus LX 570 has set the standard for both luxury and security. Harnessing the already-proven refinement, style and comfort found in most Lexus vehicles, INKAS® Armored Vehicle Manufacturing can really take it one step further by offering Level B7 or NIJ Level 4 Armor specifications without compromising many of the more luxurious features found within the vehicle.

Refinement and technology best describes this vehicle. It combines the brute strength of a massive V8 5.7L engine with the grace of a six-speed sequential-shift transmission providing 383 horsepower. It comes with features like all-wheel drive, crawl control, multi-terrain select and active height control which makes it a tech geek as well as trendy. The armored LX 570 becomes a dream come true for those whose lives are at stake, giving it all round 360-degree protection and a full package of safety features specially built by INKAS®.

With these handpicked features of the next generation, this car is dedicated to the flock who dream of a cool valley under a desert sun.

This is not your average Lexus.

Unmistakably one of the de facto choices when it comes to armored vehicle purchasing, because of its comfortable interior combined with uncompromising performance and off-road capabilities.

Welcome to uncompromising luxury and relentless performance. The INKAS® Armored Toyota Land Cruiser takes personal security to soaring heights with its unwavering commitment to excellence.

Fusing off-road mastery with on-road elegance, the Toyota Land Cruiser offers a premium driving experience for drivers and passengers who demand leading sophistication, and a clear choice for drivers and passengers who require bullet-proof transportation for up to 7 passengers. A spacious interior with a list of premium optional upgrades, and coupled with a beastly 381HP 5.7 liter engine, the Toyota Land Cruiser creates a class of its own for unparalleled power, performance, engineering and reliability, and it is no wonder why it remains the top selling and globally exported armored vehicle among the INKAS® Armored lineup.

Due to its high demand, INKAS® has accumulated a wealth of experience in securing the Toyota Land Cruiser with reinforced brake and suspension systems necessary to handle the additional weight of armor, as well as perfecting their laser-cutting technology to better protect against ballistic attacks.

A lot of research goes into determining what materials to use and how to achieve the lightest weight possible without compromising safety.

Offers excellent performance, high-security and beautiful styling all at an affordable price making this armored SUV a best choice for the budget-conscious client.

The INKAS® Armored Toyota 4Runner is a great choice for those looking for cost-effective armored solutions. With its above-par OEM equipment, this tried and tested rugged SUV will conquer any terrain in style. With its off-road prowess already proven in the 1990s, the Toyota 4Runner drives and handles better than any of its predecessors.

Utilizing its 4.0-liter V6 engine, the Armored Toyota 4Runner will make 270 horsepower and 278 pound-feet of torque which gives it enough pep to handle BR6+ armor levels. The interior cabin is nicely appointed and feels luxurious but dependable and sturdy at the same time.

INKAS® Armored Vehicle Manufacturing only uses the highest quality materials in all of its builds. Stringent quality control practices are in place with the manufacturing of every vehicle. Being an ISO-Certified manufacturer, all processes, staff and safety measures are strictly enforced in order to guarantee the highest build quality as well as industry-leading after sale service and support.

*Only steel that passes the ultimate

This armored SUV with its eye-catching exterior and lush yet safe interior will ensure your security while moving you around in style.

INKAS® Armored Cadillac Escalade is a very special armored vehicle. While its exterior styling is sure to catch attention, its bulletproof features will make anyone feel secure within it. Equipped with all factory technology features and boasting a 6.2L V8 engine, this 420HP beast will surely move you around in style. Utilizing its already spacious interior, INKAS® has the ability to offer customized packages for interior appointments, features and designs.

You are sure to catch attention riding in this SUV; turning heads is commonplace when an Escalade rolls down the street. Reliable power given off from a small block V8 has a cylinder deactivation feature, for the times when you're trying to conserve fuel on long highway travels. Included luxury OEM features such as 22" chrome alloy wheels, LED headlights and a full rear-seat DVD entertainment system, accompany a full leather hand sewn interior. An advanced armored rear bulkhead and proprietary overlap system is installed to complete INKAS® 360-degree perimeter cabin protection. To match the elegant OEM interior, each rear bulkhead is upholstered with high quality materials.

Essentially, INKAS®'s armored Cadillac Escalade is an optimal SUV for protection of up to seven passengers.

Ongoing training and specialized research guarantees they [staff] have the most up-to-date training, knowledge, and resources at their disposal.

This large, luxurious and secure SUV is specifically engineered to protect you from attacks that other vehicles in this class may have a hard time standing up against.

Built on a sturdy truck frame, the armored Yukon Denali is manufactured to withstand punishment that standard SUVs in this class cannot. All while incorporating outstanding armoring technology to withstand attacks from assailants as well.

Secure and brutishly big this armored vehicle will power over any obstacle in your path, leaving them in your dust. Due to its massive size, the power is summoned from a 6.2-liter V8 that produces 420 hp and 460 lb-ft of torque giving you enough oomph for the additional weight of the installed armor as well. Satellite navigation, Bluetooth connectivity and adjustable foot pedals comprise just a few luxury features found in the spacious leather trimmed interior.

WWW.INKASARMORED.COM

Sirens, front and rear LED strobe lights and a P/A system deter prospective aggressors by bringing attention to the situation. If tensions escalate to rounds fired, INKAS® full perimeter armoring can stop up to 308 Winchester FMJ ammunition, in accordance with NIJ Standard 0108.01 Level 3 or CEN 1063 Level BR6.

An advanced armored rear bulkhead and proprietary overlap system installed between all open crevices complete INKAS® Armored 360-degree perimeter protection.

Known for combining a large and comfortable interior with ultimate off-road and towing capabilities, the Chevrolet Suburban is a great choice for armoring.

The Armored Chevrolet Suburban SUV is unmistakably one of the de facto choices when it comes to armored vehicle purchasing, and with good reason: combining a large and comfortable interior with its performance, off-road and towing capabilities, it is definitely a great choice for armoring. Moreover, Chevrolet Suburbans are built on a truck-based platform, its powerful engine and thick frame really lend themselves towards armoring.

Plenty of space is supplied to seat seven occupants comfortably, with a great deal left over for cargo. What makes this beast go is a 5.3L V8 yielding 355hp, attached to a six-speed sequential shift transmission, making it easy to distribute the power to the pavement. Power locks and windows, touchscreen infotainment system and second row folding seats round out some of the features found in this armored SUV.

An executive interior package is recommended for this vehicle and can be installed during the armoring process, including a separating bulkhead between driver and rear seats, a full-size LED screen, bar and premium sound system.

A new-generation of bulletproof glass, which is more transparent compared with other ballistic glass, is installed in the vehicle's windows.

This monster of a bulletproof SUV has set the standard for both reliability and security by offering marvelous off-road capabilities as well as industry-standard protection.

The Jeep Grand Cherokee SRT8 is known the world over for marvelous off-road capabilities, a healthy power-to-weight ratio and sporty handling. Fortified with unequalled armoring technology INKAS® delivers this model as an armored SUV while closely adhering to the vehicle's original characteristics.

Uncompromising, you will be able to cross all types of rough, rugged terrain in this bulletproof SUV while still managing to keep a high standard of comfort. The 4x4 power train is equipped with a powerful 6.4L V8, which delivers ample power for off-roading and great fuel consumption. The Grand Cherokee SRT8 comes standard with dual-zone automatic climate control, keyless entry with push-button start and Jeep's Uconnect infotainment system, which includes a six-speaker stereo, a USB port, Bluetooth, an SD card slot and a 5-inch touch-screen display. Armor installed by INKAS® is behind body panels for a factory finish and each pillar is reinforced from top to bottom. There is always room for more security with optional extras like tailpipe protection, door travel retainers and operable front windows.

The Jeep name is a landmark in off-road vehicle manufacturing and the ultimate armored mid-sized SUV.

Ultimately this bulletproof luxury sedan has all the creature comforts one grows accustomed to, while still providing excellent ballistic and blast protection, the armored S-Class never disappoints.

If anything can be said about Mercedes-Benz, it is that this iconic auto manufacturer was built on attention to detail and precision engineering. INKAS® Armored Vehicle Manufacturing continues that reputation by incorporating top notch armoring solutions to the armored vehicles based on Mercedes-Benz S-Class.

The 2014 production year marked the introduction of the W222 body style for Mercedes-Benz S-Class models. Here at INKAS® Armored, we offer armoring solutions for the sedans based on 2015 Mercedes-Benz S550 4Matic, S63 4Matic AMG and S65 4Matic AMG. We refine the already-luxurious and technologically-advanced W222 platform using our precisely crafted and meticulously installed armoring components.

WWW.INKASARMORED.COM

Whether it's a sedan based on 2015 Mercedes-Benz S550 4Matic with 449hp or 2015 Mercedes-Benz S65 AMG with 621hp, rest assured that the twin-turbo engines will easily take care of the additional load added when armoring. Our goal at INKAS® Armored is to ensure that neither passenger nor driver are inconvenienced, or in many cases, even notice the vehicle's ballistic protection.

For 18 years, INKAS® has built itself on a reputation of quality—zero in-vehicle casualties has a way of bolstering one's esteem—and craftsmanship in a bulletproof package.

Known for its aggressive styling and performance, this luxury armored sedan based on the Mercedes CLS-Class is sure to offer a secure and comfortable ride.

Like every armored sedan based on Mercedes-Benz, it's sleek, poised and rakish. Like no car before it, the armored sedan based on the CLS-Class welcomes its four passengers through four inviting doors with a full range of security and safety. Building upon world-class reputation, INKAS® Armored Vehicle Manufacturing adds security by offering this model as an armored sedan.

While driving this armored vehicle, take pride in knowing you are driving the best in the luxury car industry, while still having the security INKAS® provides. The thrill of driving this bulletproof car is only enhanced by the acceleration and speed provided by a twin-turbo 402hp Direct-Injection V8. Power being a key aspect so too is safety, with innovative factory features Active Lane Keeping Assist, Active Blind Spot Assist and DISTRONIC PLUS cruise control, each implemented to keep you safe on the road.

Safety and security is bolstered with innovative ballistic and blast armoring. Featuring INKAS® proprietary overlap system designed to protect the vehicles occupants from bullets shot between the seams of the doors, without the loss of comfort.

INKAS® has brought its state-of-the-art and highly customized approach to the needs of an ever-growing list of clients.

Elegant and impeccably designed armored sedan from the manufacturer known for the highest levels of luxury is the best choice for those in need of comfort and safety.

Elegant and impeccably designed is the best way to describe the Lexus LS 460L. From an auto manufacturer known for the highest levels of luxury, INKAS® Armored Vehicle Manufacturing adds the same level of security with our armoring components.

Excellent reliability and protection are not the only aspects to love from this bulletproof sedan, taking a ride in the back seat can only be related as one of the most comfortable rides available. While the 4.6L V8 cranks out 360 horsepower, the eight-speed automatic transmission transfers that power to the road with precision. Plentiful amenities are present in the flagship Lexus LS 460L but the rear seat focused Executive package which includes a rear seat ottoman, is something to envy in any other class of vehicle. INKAS® has armored the passenger cabin to withstand bullets and grenade blasts while keeping the highest level of luxury. While installing our armor, all interior moldings and trim panels are redesigned to look as close to factory finish as possible.

The armored Lexus LS 460L is in the top tier of luxury and security, don't look any further when deciding on a bulletproof sedan.

The vehicles are designed not to call attention to themselves, their appearance and performance are kept as close to original as possible.

Enjoy a comfortable interior, great fuel economy, reliability and solid protection of this armored sedan from INKAS® without attracting unwanted attention to yourself.

The armored Toyota Camry XLE is the perfect armored daily driver, providing solid protection while remaining low-profile. It does not attract any unwanted attention and is an extremely reliable and economic security solution. The Camry can be armored to defeat up to 7.62 caliber ammunition. For clients looking for additional security while still remaining inconspicuous INKAS® offers this model as an armored sedan.

The V6 gas engine with a 6-speed automatic transmission provides the power needed while still maintaining outstanding fuel economy. This Camry comes equipped with added features of navigation on a 6.1 inch touchscreen, Bluetooth, 10 speaker JBL speaker system, blind spot monitoring and rear view camera. Adding to all the included technology INKAS® Armored Vehicle Manufacturing implements state-of-the-art OE-style curved ballistic glass as well as full perimeter, roof and floor armoring.

When looking for a low profile daily driver, the armored Toyota Camry offered by INKAS® is the way to go.

From the outside, the Camry built by INKAS® hits all the same sleepy notes... But then there's the invisible: blast protection in the floor, AK-47-proof glass, fire suppression system, run-flat tires.

The armored bus based on Mercedes-Benz Sprinter is often utilized as a secure cash-in-transit solution designed not to attract unwanted attention.

Transportation of monetary and personal goods is one of the specialties of this vehicle. Full size protection by INKAS® and a high roof body reduces the risk of threat to personnel, as well as the valuables inside. The van is ideal for bank pick up, confidential pick up, precious jewelry, large valuable cargo and much more. With a 3.0-liter V6 turbo diesel DOHC 24-valve engine, 7-speed automatic transmission with manual mode, rear wheel drive and 4 wheel disc brakes this vehicle is very easy to maneuver. Its comfort level consists of automatic climate control, cruise control, power locks and spacious seating. This chassis has become amongst the leaders in armored courier services.

With a modern redesign of the classic panel van, this bulletproof truck based on the Mercedes-Benz Sprinter is a prime candidate for a low profile armored cash in transit vehicle. Security of both personnel and payload are paramount in the cash in transit industry.

This armored cash in transit van is perfect for clients looking for an affordable option to transport their valuables while also being inconspicuous.

Don't let the exterior fool you, this Mercedes Sprinter is a rolling bank vault in sheep's clothing.

Specifically designed by INKAS® engineers to suit the stringent requirements set forth by those needing to move large quantities of cash or other valuables.

Built on the tried and true Ford F-550 chassis this armored cash in transit vehicle is ideally suited to meet the requirements of clients needing to move their valuables with a crew of up to five. INKAS® has the safety of crew and cargo in mind when designing armoring for this vehicle for real life situations.

Rugged and heavy duty, the Armored Ford F-550 CIT is built to last and take on any obstacle in it's path. The V10 Triton 6.7L SACT and 6-speed Automatic Transmission fuels this vehicle for long distance Cash-In Transit operations and can easily accommodate the extra payload of armor and crew. In addition to the standard features of four disc brakes with ABS, Climate control, AM/FM Radio and power steering, INKAS® offers armoring levels up to CEN BR6 able to stop 7.62mm rifle ammo. More in the way of security, INKAS® has many other armoring options to customize this chassis to fit any requirement a client might have.

The armored Ford F-550 cash in transit vehicle is hands down a great vehicle for protecting anything from diamonds to cash to anything in between.

The world leader in the design and production of specialized armored vehicles.

A maneuverable and economical cash in transit vehicle designed for densely populated urban zones offering great efficiency and versatility.

Without deviating too much from the original layout of the Ford Transit cargo style van, INKAS® Armored Vehicle Manufacturing has engineered one of the best low profile cash in transit vehicles to date. By offering this model within its armored cash transport line up, INKAS® continues to prove itself as an industry-leader.

Ford Transits are one of the most sought after cash in transit vehicles because they are extremely versatile and customizable. The version used by INKAS® is equipped with a 3.2L diesel 185 hp engine offering enough power to carry the added payload of the applied armor and on-board crew. With a smart locking system designed for cash in transit usage, an integrated access control module as well as reinforced door hinges and other critical structure points this van is a great choice for transporting cash and valuables. Being highly customizable, INKAS® offers a slew of upgrades and accessories to fill the need of any client's specifications.

The armored Ford Transit is a leader in this market for a reason; it makes for a great bank cash in transit vehicle.

A large-scale cash in transit truck manufactured to enable the smooth and efficient transport of cash, jewelry and other high-value goods.

This armored cash in transit vehicle based on the Hino 338 incorporates a high payload capacity with plenty of room for cargo as well as 2-3 person crew. It offers ballistic protection up to NIJ IV/CEN BR7. This truck was fully designed and built in-house at the INKAS® plant in Toronto, Canada, using certified and tested light-weight armoring materials.

This armored cash in transit truck is perfectly suited for hauling large payloads and a 3 person crew. There is more than enough power to do all that with 260 horsepower and 8L diesel engine mated to a 6-speed automatic transmission. Among its security features are a smart locking system specifically designed for cash in transit usage as well as video surveillance of both internal and external viewpoints. The cabin is completely protected with 360-degree perimeter protection including an overlap system designed to stop bullets from penetrating through the door seams. The payload area is completely configurable to conform to any client's specifications.

The armored cash in transit truck based on the Hino 338 is a fortress on wheels and will more than satisfy the requirements of any bank or large asset transport agency.

INKAS® Armored has been manufacturing all of its vehicles in Canada paying close attention to advanced production technologies and quality control.

INKAS® has engineered this armored Toyota Land Cruiser from the ground up to provide its clients with a super-secure, reliable, yet practical cash in transit van.

The Armored Toyota Land Cruiser 79 is designed to carry large amounts of cash and valuables in a 100% secure environment and across vast distances. This vehicle is built-to-order and has the ability to be customized both internally and externally in order to suit a specific need. INKAS® has engineered this vehicle from the ground up to build a reliable bulletproof cash in transit vehicle.

The Armored Toyota Land Cruiser 79 is ideally suited for pallets of both cash and coin while still accommodating a crew of 2-4 and is designed to be highly configurable both inside and out.

INKAS® offers a wide assortment of upgrades and accessories to meet any client specification. Armoring solutions such as Hutchinson run flat tires, armored rear bulkhead and reinforced suspension all ensure piece of mind that the entire payload as well as crew will be kept from harm's way. This vehicle is armored with a NIJ IV/CEN BR6+ ballistic rating, which can stop high power rifle ammo from the likes of a 308 Winchester if necessary.

INKAS® has made a habit out of blowing us away with its unique aftermarket programs.

Armoring and stretching adds both extra safety and comfort to one of the most popular vehicles in its class, essentially creating a virtual boardroom on wheels with power to match.

This armored limousine based on the Mercedes-Benz G63 AMG stands out from the crowd due to its unique exterior upgrades as well as various VIP interior features making this limousine one of the best-equipped armored vehicles on the market today.

Electroluminescent bulletproof glass is installed allowing passengers to have more comfort and privacy without compromising safety. INKAS® also fits the vehicle with an entirely new and customized interior as well as equips it with luxurious features including, but not limited to the most luxurious materials available on the market including exotic leather and curved wood, an innovative lighting system, customized captain-style seats, the latest generation of satellite telephones and TV systems, a fully-functional dry refrigerator, an indoor exhaust system, a speed-vault pistol holder and much more.

Most interior features are operated via an iPad mini using the innovative Limo Control system developed by INKAS® Armored. It allows for the control of the vehicle's lighting, seats, cameras, ventilation, audio and TV systems as well as the operation of the partition between the driver and the passenger compartments.

INKAS® bridges the gap between luxury and security with the G63 AMG.

WWW.INKASARMORED.COM

The Huron is an armored personnel carrier that can seat 16 police or military personnel comfortably and protect them in high-threat environments across many terrains.

Huron is a unique APC in terms of technical specifications, design and assembly. The vehicle is characterized by a high level of maneuverability and is extremely lightweight relative to its size. It incorporates revolutionary lightweight armor which increases its mobility and speed performance in comparison with other similarly-sized vehicles in the market. Huron's well-proven off-road capabilities are supported by an 8.3L Paccar Engine and a ten-speed manual Allison Transmission. The OEM body of the vehicle was replaced with a fully re-designed body that incorporates heat and noise insulation materials providing an unprecedented level of comfort to its occupants.

The vehicle's ballistic design and special armor protection are aimed to maximize its ability to protect passengers in any environment and allow the vehicle to endure high levels of attacks while maintaining its full performance. Huron's perimeter armoring of the passenger compartment and engine bay is designed to provide protection against 7.62x51 SC ammunition, 7.62x51 M80 NATO Ball ammunition and tested to meet NIJ-STD-0108.01 Level III as well as CEN Level BR7 ballistic standards.

A perfectly-outfitted armored vehicle for both military and post apocalyptic survival operations.

The INKAS® Sentry APC is a tactical attack and defense vehicle designed to serve in extreme climate conditions. It is a unique APC in terms of technical specifications, design and assembly.

The INKAS® Sentry APC is a tactical attack and defense vehicle designed to serve in extreme climate conditions. It is a unique APC in terms of technical specifications, design and assembly. A truly innovative approach was taken when designing the vehicle utilizing the best engineering solutions implemented in previous models. The new APC is characterized by a high level of off-road performance and maneuverability. With a heavy duty truck chassis, this vehicle remains reliable in the most demanding conditions, thanks to custom-designed components upgraded to provide increased weight capacity and reliability.

The INKAS® Sentry APC can be equipped with dual protective layers ensuring its passengers safety from both ballistic as well as blast attacks. The advanced armoring materials provide protection against 7.62×51 SC ammunition, 7.62×51 M80 NATO Ball ammunition and tested to meet NIJ-STD-0108.01 Level III as well as CEN Level BR7 ballistic standards. The new APC features perimeter armoring of the passenger compartment, engine bay as well as key mechanical components. The vehicle is equipped with multi-layer ballistic glass and INKAS® proprietary overlap system to protect from bullets being shot between seams of doors.

The Sentry APC is a bit of everything — mobile command center, armored personnel carrier, medical evacuation vehicle, and bulletproof off-roader.

INKAS® Armored Riot Control Vehicle was designed and built to allow law enforcement personnel to stay safe and secure while driving straight into harms way.

Having been built on a Freightliner M2106 RVC chassis makes this vehicle a sound choice for armoring. Custom engineered by INKAS® Armored Vehicle Manufacturing, this armored riot control vehicle is a world-class crowd dispersal tool.

Being both super maneuverable and fully armored, this vehicle offers law enforcement personnel piece of mind while driving straight into harms way. Powered by a monster Cummins diesel engine pumping out 295 horses and a whopping 1000ft-lbs of torque allows a driver to push stationary vehicles out of the way with ease. Equipped with high pressure water pumps with regulated nozzle pressure, chemical additive tanks, a fire extinguishing system, adjustable-height ram-bumper to clear heavier obstacles and surveillance equipment with recording capability, makes this riot control vehicle very versatile. Providing protection for the crew, INKAS® has fully armored this vehicle to withstand multiple high velocity rounds as well as shrapnel from detonations.

Best in the riot control market, the INKAS® Armored Riot Control Vehicle is hands down the most versatile option available.

INKAS® makes some pretty hardcore armored cars and, trust us, you don't want to mess with them.

Due to its high level of protection and mobility along with ultimate comfort, this APC is the most popular choice for Police forces as well as other security agencies worldwide.

This APC is widely used by Police forces, SWAT, and other Security Agencies in North America and around the world. It is designed to provide protection and mobility, along with a high level of comfort to its occupants in all climates across all terrains.

With a Heavy Duty Truck chassis, this vehicle remains exceptionally reliable in the most demanding conditions, thanks to the custom designed axles and other key components upgraded to exceed OEM standards and to provide increased weight capacity and reliability. INKAS® APC is equipped with advanced blast and ballistic protection, handling and maneuverability, increased tire size as well as significantly improved ground clearance. The armored vehicle is equipped with many armoring features such as ballistic glass, vehicle floor armoring, roof armoring and INKAS® proprietary overlap system protecting all occupants from all directions.

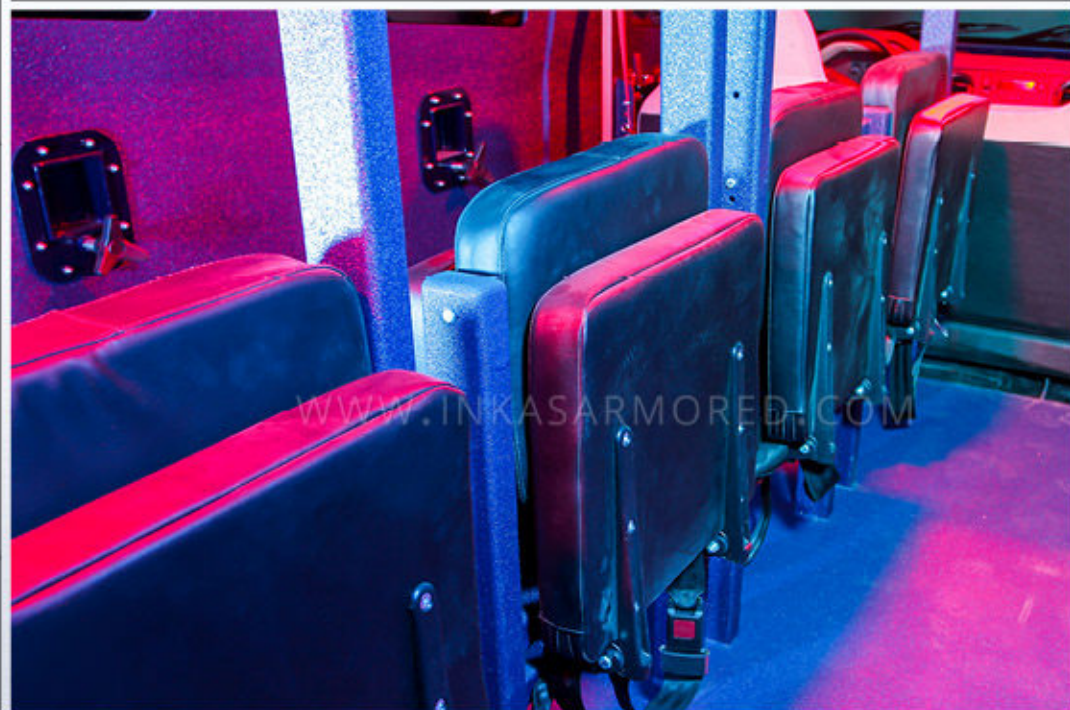

With this vehicle, INKAS® has cultivated a team of renowned engineers who have successfully created a class above the already-impressive previous generations of armored personnel carriers.

There's something strangely appealing about a vehicle like this — the inside is such a protective little cocoon, and you can just imagine the sorts of adventures or situations you might be in inside one of these.

The armored Police Ford Explorer is an easily-customized vehicle, which provides maximal protection for law enforcement allowing for an efficient, practical and safe work environment.

Designed for law enforcement purposes, this armored cruiser is easily customized. It comes pre-equipped with bush bars, gun ports, firearm cabinets, first aid kits and much more based on the specific requirements of the customer and usage scenario.

The vehicle's global success has come from standard features such as Hutchinson run-flat tires, INKAS® overlap system which provides protection from rounds penetrating door seams, an armored rear bulkhead, reinforced suspension as well as a performance braking system. INKAS® also benefits its clientele by offering additional tactical components which may not be standard-issue or historically available on vehicles of this class.

With it's amazing power-to-weight ratio, this swift and sturdy armored vehicle is a tremendous asset to any agency. These vehicles can be built-to-order on a one-off basis or via our fleet program in order to fulfill larger agency-level demands.

The design and engineering team will spend weeks — and sometimes months — toiling away at the intricacies of each vehicle to maximize space and safety.

WWW.INKASARMORED.COM

Security, safety, quality, performance – all words used to describe the guiding principle here at INKAS®.

We believe that if we do not, or cannot impose and meet our own stringent guidelines in the manufacturing and distribution of armored vehicles – we shouldn't be in the business in the first place. We aim to over-deliver with every job by offering stellar customer service, quick turn-around, and knowledgeable recommendations when it comes to the purchase of armored vehicles.

All of our work is done to international specifications and only the highest quality materials and glasses are used. We have been issued certifications from numerous international organizations in order to establish ourselves as a reputable and established armored vehicle manufacturer on a global scale.

With the sheer amount of resources that typically need to be allocated towards the purchase of an armored vehicle, it makes sense to opt for a manufacturer with proper certifications in order to ensure the safety of everyone involved.
